Election/Restriction

Group Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-39, and 54, drawn to combination therapy of treating an HIV-infected patient, classifiable in class 514, subclass 44.

Group II: claim 39, drawn to a preventive vaccine to prevent an HIV infection in a subject at risk of having an HIV infection, classifiable in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Group I and Group I are distinct because the methods are directed to distinct goal and comprise materially distinct steps: a subject having an HIV infection vs. a subject at risk of being infected with an HIV.

Should Group I elected, the claims are generic to a plurality of disclosed patentably distinct species comprising:

- A specific species of a further administration of HIV-anti-therapy as recited in claims 7-9, 20-24;
- A specific species of particularly administration period and/or cycle of the combination of CpG and anti-therapy, see claims 15-19, for example;
- A specific species of CpG containing nucleic acid as recited in claims 25-38, for example. DNA motif as claimed in claims 9-14, 106, for example;

Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species from the respective claims as listed and cited above, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these species are structurally distinct, and because a search of one does not necessarily

Art Unit: 1632

overlap with that of another species, it would be unduly burdensome for the examiner to search and/or consider patentability of all of the claims as presently pending.

Applicant is advised that the response to this requirement to be complete must include an species election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Dave Nguyen* whose telephone number is **(703) 305-2024**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Deborah Reynolds*, may be reached at **(703) 305-4051**.

Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center number is **(703) 305-7401**.

Any inquiry of a general nature or relating to the status of this application should be directed to the *Group receptionist* whose telephone number is **(703) 308-0196**.
